Contents

Preface		vii
Chapter 1.	**Retinal Cell Fate Determination** C. L. CEPKO	1
Chapter 2.	**The Synaptic Populations of the Fly's Optic Neuropil and their Dynamic Regulation: Parallels with the Vertebrate Retina** I. A. MEINERTZHAGEN	13
Chapter 3.	**Histamine in the Retina and Some Other Components of the Visual System** J. Z. NOWAK	41
Chapter 4.	**The Properties of the Serotoninergic System in the Retina** W. J. BRUNKEN, X. T. JIN and A. M. PIS-LOPEZ	75
Chapter 5.	**Biochemical Ageing in the Retina and RPE** G. E. ELDRED	101
Chapter 6.	**Retinal Control of Eye Growth and Refraction** J. WALLMAN	133
Chapter 7.	**Retinopathy of Prematurity: Origins in the Architecture of the Retina** T. CHAN-LING and J. STONE	155
Chapter 8.	**Mechanisms of Retinal Adhesion** M. F. MARMOR	179
Chapter 9.	**Lens Transdifferentiation in the Vertebrate Retinal Pigmented Epithelial Cell** G. EGUCHI	205
Chapter 10.	**Autosomal Dominant Retinitis Pigmentosa: Molecular, Genetic and Clinical Aspects** P. HUMPHRIES, G. J. FARRAR and P. KENNA	231
Chapter 11.	**Synaptic Growth in the Rod Terminals after Partial Photoreceptor Cell Loss** S. SANYAL	247
